Personal Projects

Hotel Booking Website | MERN Stack, Tailwind CSS, REST API ↗

- Engineered a full-stack hotel booking system using the **MERN stack**, architecting **15+ high-performance REST APIs** for bookings, inventory, and user operations.
- Implemented **Clerk authentication with RBAC**, ensuring secure user/owner workflows and seamless frontend-backend integration.
- Built optimized, mobile-first UI components with **React + Tailwind**, and delivered owner-side management tools with real-time booking analytics.
- Integrated robust **hotel and room management workflows**, including image uploads, amenity selection, availability updates, and automated price handling to streamline operations.

PrimeMart – E-commerce Web Application | React.js, JavaScript (ES6+), HTML5, CSS3, REST API, Git ↗

- Created a **responsive e-commerce platform (PrimeMart)** product catalog, shopping cart functionality, and user authentication.
- Utilized **reusable React.js components** to streamline development and integrate with third-party APIs for real-time product data.
- Improved frontend load speed by **20%** through asset optimization and guaranteed **cross-browser compatibility**.
- Managed the codebase using best practices for **Git and GitHub** version control.

Online Book Store ↗

- Designed a responsive online bookstore with categorized sections for easy navigation.
- Improved UI/UX with clean layouts and cross-device compatibility.
- Tech Stack:** HTML5, CSS3, JavaScript
